

# Brown Marmorated Stink Bug

## “B.M.S.B.”

- Adult marmorated stink bugs are about half an inch long, mottled brownish or grayish in color, with white bands on the antennae, sides, and legs.
- Very young bugs, called nymphs, are orange or red with brown. As they get older, the nymphs become dark brown.

If you find one of these insects please contact your County Extension Agent. Visit the following address to find your County Agent: <http://solutionsforyourlife.ufl.edu/map>
